Course Description.
What is our ethical responsibility to non-human animals and our environment? This seminar will introduce students to major philosophical questions in animal and environmental ethics: What are the key differences between humans and other animals? Is it ethical to eat, conduct tests on, and/or keep animals as pets? What are the environmental consequences of such decisions? How ought one to respond to unethical laws? Students will develop a cross-disciplinary perspective in the fields of animal studies, ethical theory, and environmental philosophy by understanding how contemporary philosophers, environmental scientists, ecologists, activists, and journalists have responded to key ethical questions concerning animals and the environment. Animal-machines, the life-world of the tick, ethical meat eating, radical vegetarianism, the evolution of pets, wilderness preservation, ecological sabotage, and civil disobedience will all be topics explored in this course.

This seminar will also introduce students to the processes of research, writing, and critical thinking by guiding them through an original research project on an issue in animal and environmental ethics. Students will learn to conduct collaborative research, write philosophical and argumentative papers, peer review each others work, and debate contemporary ethical issues in animal and environmental philosophy. This class will prepare students not only to make original contributions to the emerging field of animal ethics but will also provide them with conceptual tools for grappling with similar ethical issues in their personal lives.

Required Readings.
All texts are available as PDF’s. Students are expected to print these texts and bring them to class every day. All texts in the reading are required reading.

Course Requirements.
1. Participation 10%
2. Three 2 page reading responses 30%
3. Proposal, Outline, and Bibliography 10%
4. First research paper (4-6 pages) 20%
5. Final term paper (8-10 pages) 30%

Participation/Attendance: You are expected to participate actively in this class, which includes attending class, reading all assigned material prior to class, bringing all readings to class, and participating productively and professionally in class discussions. Missing three classes for any reason will result in a full grade reduction. An additional full grade reduction
will be made for each additional missed class after the third. You will be expected to
document your presence in class by signing a daily roll sheet. Three late arrivals for class will
count as one absence. If you fail to bring the appropriate texts to class you will be counted
as late. The quality and quantity of your participation in the class discussion will be evaluated
in assigning 10% of your final grade. In addition to any penalties that you receive for failure
to attend class, absences from class will also negatively affect your participation grade.

**Reading Responses:** There will be three 2 page reading responses that will articulate the
positions of the author of the text and the response/evaluation of the student. These
responses will then be peer reviewed and responded to by another student. These responses
are intended to practice and develop writing skills and stimulate discussion during the class.

**Proposal, Outline, and Bibliography:** At the end of the third week of class students will
turn in a 1-2 page proposal for their final research paper. This proposal is not a commitment
to the topic, but is a way to get feedback and orient the student toward their final research
topic in general. After the research topic has been approved the student will (in week four)
turn in an outline of the structure of the paper and a bibliography of the works they intend
to read and cite in their final essay. We will discuss all of these in scheduled conference in
week five.

**First Research Paper:** This first research paper is not a “draft.” It will be graded
independently from your final research paper. It will be 4-6 pages, and will later be expanded
to an 8-10 page final research paper. The grade of this first research paper will also include
your peer review of another student’s paper during Class Peer Review in week 6. Further
details of this first research paper will be given in class.

**Final Research Paper:** This 8-10 page paper will be a revised and expanded version of
your first research paper. It will also require (among other things) an expanded bibliography.
This paper is due on the date scheduled for the final exam.

**In Class Writing Assignments:** There will be numerous in-class writing assignments
approximately 10 pages over the course of the term. These assignments will also be part of
your participation grade.

**Policies.**

**Incompletes and extensions** will be given only in the event of documented emergencies.
Late papers will lose one letter grade for each calendar day that they are late.

**Retaining copies of all coursework:** Please retain copies of all work submitted and the
original copy of all work returned to you during the term until the final course grade has
been posted. In the event of any question concerning whether grades have been accurately
recorded, it is your responsibility to provide these copies as documentation.

**Computers and other electronic equipment:** Use of electronic equipment, including cell
phones, pagers, MP3 players, AND LAPTOP COMPUTERS is prohibited during this class.
Exceptions to the prohibition of laptops may be requested from the instructor and will be granted only for legitimate academic reasons. Use of laptops for academic reasons will be monitored throughout the term, and failure to restrict their use to this function will result in the revocation of any laptop privileges.

Email: Please check your email regularly, I will be emailing you several times during the term.

Academic Honesty: Please review and familiarize yourself with the provisions of the University of Denver Honor Code regarding academic honesty. You can find a summary in each term’s Schedule of Classes or at: http://www.du.edu/studentlife/ccs/2010--2011%20Honor%20Code.pdf. Violations of academic honesty will be met with disciplinary action (the usual punishment is an “F” for the course). Definitions and examples of plagiarism, fabrication, and cheating are posted in the student life handbook.

Inclement Weather: It is generally expected that class will meet unless the University is officially closed for inclement weather. If it becomes necessary to cancel class while the University remains open, this will be announced via email.

Advising
As your advisor I will also be setting up face-to-face meetings with each of you in during advising week in Fall term to help advise you for Winter 2012 registration and during Winter advising week for Spring 2012 registration.

Individual Differences: If you experience difficulty in this course for any reason, please don’t hesitate to consult with me. If you have a documented disability that may prevent you from fully demonstrating your abilities, you should contact me personally as soon as possible so we can discuss accommodations necessary to ensure your full participation and facilitate your education process. The university offers a wide range of services to support you in your efforts to meet the course requirements. Students may also contact the Disability Services Program (DSP) by email dsp@du.edu, phone (303-871-2278), or in person. Disability Services determines accommodations based on documented disabilities and is located on the 4th floor of Ruffatto Hall, 1999 E. Evans Ave. DSP -- 303.871.2278 / 7432 / 2455. Information is also available on line at http://www.du.edu/disability/dsp; see the Handbook for Students with Disabilities.
